Introduction:

Gold Cash (GOLD), a CPU/GPU-mineable, application-specific integrated circuit (ASIC) resistant, “super rare” coin that you can mine with your home computer. There will only be a total of 200,000 GOLD mineable over a period of 42 years~. The coin launched on June 15th, 2020 with a small community of Developers and Investors from backgrounds in Business Management and Marketing, Software Development and Testing, Finance, and other disciplines. This skilled, and enthusiastic Team, plans to build a uniquely strong and scarce cryptocurrency, and an inclusive, and welcoming, crypto community.

We believe GOLD will be mined, and collected, as a long term investment. This stability will further increase the scarcity, and therefore the collectability, of the coin.

We plan unique features for this coin which would make it unique in the world of cryptocurrency.

As a Team, we believe in and are excited about, the future for GOLD Cash.

Coin Specification:

Current Algorithm: Yescrypt16(CPU/GPU)

Ticker: (GOLD)

Block Time: 5 minutes ~

Current Block Reward: (0.5)

Retarget: Every Block over 50-60 minute average (Dark Gravity Wave)

Max Supply: 200,000 (GOLD)

Halving Interval: 200,000 Blocks

Length:(42 Years ~)

Premine: 2.5% (5,000 GOLD)

Mining Hardware: ASIC resistant

Built with open-source bitcoin code that has been given to the world. We have made modifications to the source code to fit our specification and mining algorithm.

Disclaimer:

“Cryptocurrencies are a high-risk investment and may not be suitable for all members of the public and all types of investors.

Before purchasing cryptocurrency, you must ensure that the nature, complexity and risks inherent in the trading of cryptocurrency are suitable for your objectives in light of your circumstances and financial position. You should not purchase cryptocurrency unless you understand the extent of your exposure to potential loss.

Cryptocurrency exchange rates have exhibited strong volatility to date and you understand that the extent of exposure to potential loss could extend to your entire cryptocurrency investment.

Many factors outside of the control of GoldCash will effect the market price of cryptocurrencies, including, but not limited to, national and international economic, financial, regulatory, political, terrorist, military, and other events, adverse or positive news events and publicity, and generally extreme, uncertain, and volatile market conditions. Extreme changes in price may occur at any time, resulting in a potential loss of value of your entire investment in cryptocurrencies, complete or partial loss of purchasing power, and difficulty or a complete inability to sell or exchange your digital currency.” -- <https://www.goldmoney.com/cryptocurrency-disclaimer>

We advice all investors to only invest what they could be prepared to lose.

Our Mission:

Our Mission is to make a rare cryptocurrency that is seen as a collectible coin for long term investment just like GOLD. That can be mined on your Home Computer. In uncertain times individuals, Business and Governments stockpile reserves of GOLD. However GOLD is difficult for small scale investors to purchase and store safely. This is the cryptocurrency alternative our Business model is designed for long term substantial growth. That offers stability in uncertain times. We plan to mirror Gold's demand and rarity by having a small max supply of coins, also a low block reward. Furthermore, we plan to make partnerships with gold merchants in the hope that GOLD Cash could be exchanged for real physical Gold. We aim to reach this high goal in 2023. This would effectively make virtual cryptocurrency mining actual precious Metal mining.

Raising Funds:

Presale - We plan to use the premine to cover set exchanges listing fees. Our first plan is for a presale of 1000 (GOLD) on an exchange to help fund moving to a low small exchange to start off the coin preferably AltMarket. Then we can discuss as a community future exchange listings based around the price of gold cash and the direction we wish to follow.

Investors - Our second plan is to trade (750 GOLD) to early investors. The funds raised will, yet again, help pay for listing fees for the first/second exchanges.

Bounty - Thirdly, to build a pot of GOLD. This will be distributed to the community as rewards for agreed work completed. For example, if someone created a new logo or pool, we would reward them with GOLD. This is called the 'Bounty Fund'. We will have only (250 GOLD) to distribute.

Roadmap:

This roadmap is subject to change depending on the value of Gold Cash, Market conditions, and other factors. We could strive further.
